

CareLogic Enterprise S3 Costs v2 Certified Health IT- October 14, 2020

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
A provider does have to sign a contract when purchasing Qualifacts Systems' CareLogic Enterprise S3.	The terms for contractual obligation are negotiable and include all third party add ons. Our certified product consists of the CareLogic Enterprise S3 core system and a few tightly integrated third party systems some of which we describe in this Costs and Limitations document.	In order to gain access to CareLogic Enterprise S3, there's a <ul style="list-style-type: none"> • One time implementation fee per agency, • a monthly recurring fee per agency based on the number of named or concurrent users
<p>Ability to transmit prescriptions electronically to the pharmacy; conduct a drug formulary check; conduct Drug-Drug, Drug –Allergy Checks, CPOE-Medications</p> <p>Criteria:</p> <p>§170.315.b.3 – Electronic prescribing</p> <p>§170.315.a.10 - Drug Formulary Checks</p> <p>§170.315.a.4 - Drug-Drug, Drug-Allergy Checks</p> <p>§170.315 a. 1- CPOE Medication</p>	<p>CareLogic Enterprise S3 includes a seamless interface with a third party ePrescribing tool named DrFirst Rcopia. DrFirst Rcopia allows the provider to electronically prescribe (order) and transmit both controlled and non-controlled substances.</p> <p>DrFirst Rcopia includes the additional capability of conducting drug formulary checks at the point of prescribing.</p> <p>DrFirst Rcopia also conducts a Drug-Drug, Drug-Allergy Check at the point of prescribing.</p> <p>The user also has the option to contract to check the PDMP at the point of prescribing a controlled substance from within DrFirst Rcopia. .</p>	<p>There are different levels of licenses and fees associated with being able to use DrFirst Rcopia for electronic prescribing.</p> <p>The EPCS level includes a onetime identity proofing (LOA3) fee per user fee as well as an ongoing monthly fee per prescriber.</p> <p>The Standard level also includes a onetime identity proofing fee (LOA2) as well as an ongoing monthly fee per prescriber.</p> <p>PDMP includes a onetime connection fee per agency as well as an ongoing monthly fee per EPCS prescriber.</p>
<p>Electronically transmit lab orders to the laboratory and electronically receive lab results back from the laboratory.</p> <p>Criteria:</p> <p>§170.315 a. 2 – Computerized Provider Order Entry-Labs</p>	Through a seamless integration between CareLogic Enterprise S3 and Change Healthcare (Emdeon) Clinician Exchange Labs, CareLogic Enterprise S3 offers provider the option (not required) to electronically transmit lab orders to a laboratory and electronically receive lab results from a laboratory.	There is a monthly fee per user for this access to electronically write and transmit Lab orders and/or electronically receive lab results.
<p>CareLogic Enterprise S3 includes the ability to send and receive secure messages and to send and receive DIRECT messages</p> <p>Criteria:</p> <p>§170.315.e.1- View, Download, and Transmit to 3rd Party</p> <p>§170.315.e.2 – Secure Messaging</p> <p>§170.315b.1 - Transitions of care</p> <p>§170.315.h.1 - Direct project</p>	<p>CareLogic Enterprise S3 includes an External Message Center which is a secure messaging platform within CareLogic Enterprise S3 that enables the HIPAA-compliant transfer of patient health information. In order to provide this secure messaging capability, CareLogic Enterprise S3 has interfaced with a third party Health Information Service Provider (HISP), MaxMD DIRECT. For a Provider, a Direct messaging email address is required for sending and receiving external messages and/or sending and receiving a summary of care to providers or entities of care outside the agency.</p> <p>Using the Updox portal, the patient and provider can exchange secure messages and CCDAs from Updox to CareLogic through an API.</p> <p>MaxMD is required in order for a patient to send a CCDA or DIRECT message to an external provider from the Updox portal.</p>	<p>In order to be able to use the External Message center, each Provider who wants to send secure messages or transmit and/or receive a Summary of Care must have a MaxMD DIRECT Messaging Address.</p> <p>Qualifacts provides one DIRECT address at no cost to an agency. Any additional addresses are provided at a fee per month per address.</p> <p>For the Updox portal, there is a onetime setup fee per agency plus a per month per user fee for providers to utilize the Updox Patient Portal. There is no fee for the patients to utilize the Updox patient portal.</p>

	CareLogic Enterprise S3 has the means to collect the data on how often the patient views, downloads or transmits that summary of care from the Updoox patient portal.	
CareLogic Enterprise S3 includes the ability to save and store external documents, within each patient's electronic health record, to a document library. A CCDA can then be parsed and a clinical information reconciliation can be done. Criteria: §170.315.b.1-Transitions of care: §170.315. b.2 Clinical Information Reconciliation	When a provider receives an external document such as the CCDA via the external messaging feature or an image result from the patient via mail, email, or fax (for example), that document can be uploaded to each patient's document library for storage and to view as part of the electronic health record. When a CCDA is received through the external messaging center or uploaded into the EHR, the EHR will parse the data so that the user can reconcile the medications, medication allergies, and problems.	Qualifacts charges a flat rate per month per agency for the first 50GB of storage and an additional flat rate per month for each additional 50 GB of storage.
CareLogic Enterprise S3 provides an ad hoc report writing tool that can be used to build, modify, and run reports. Criteria §170.315.g.2. –Automate Measure Calculation	User can use our ad hoc reporting tool, called Pentaho to run the MACRA MIPS and Promoting Interoperability reports. The tool can also be used to build other reports such as patient lists for research or patient lists to determine who needs a patient reminder about such things as a flu shot, for example.	Qualifacts charges a per report writer per month fee to have Pentaho report writing capability. We provide a Pentaho user console for users at no cost for users who just want to run reports or make simple changes.
CareLogic Enterprise S3 includes many clinical quality measures in CareLogic S3 for the provider to use for attesting to the quality payment programs. Criteria: §170.315. c.1.-3- Clinical Quality Measures – capture and export, Clinical Quality measures-import and calculate.	One of the clinical quality measures in CareLogic Enterprise S3 includes a requirement to use a diagnostic tool for depression screening called the PHQ-9. If the provider chooses this particular Clinical quality measure, he will need to incorporate the PHQ-9 score into the electronic health record for Clinical Quality Measure capture. The provider has the option of manually documenting the PHQ-9 score in the electronic health record or using our integrated Assessment tool called IMPACT . CQM report set up requires Qualifacts intervention.	Qualifacts charges a per month per CareLogic Enterprise S3 user fee for the IMPACT assessment tool.
CareLogic Enterprise S3 has an interface (connection) with the Updoox patient portal that allows us to track when a patient views, downloads, or transmits (VDT) their summary of care. Criteria: 170.315.e.1 - View Download Transmit 3rd Party 170.315.g.2 Automated Measure Calculation-Patient Electronic Access	CareLogic Enterprise S3, through its External Message Center, provides the provider a way to share the patient's summary of care (CCDA) with the patient each time new information is available. This process allows the provider to send the summary of care to any patient who has an Updoox patient portal account set up. We have the means to collect the data on how often the patient views, downloads or transmits that summary of care from within the Updoox patient portal.	Updoox patient portal: There is a onetime setup fee per agency plus a per month per user fee for providers to utilize the Updoox patient portal. There is no fee for the patients to utilize the Updoox patient portal. Qualifacts charges a per report writer per month fee to have Pentaho report writing capability. We provide a Pentaho user console for users who just want to run reports or make simple changes at no cost to the user.
The American Psychiatric Association (APA) requires users to gain permission before using the DSM-5 codes as they are proprietary to the APA. Criteria: §170.315.a.9.-Clinical Decision Support §170.315. a.13- Patient Specific Education Resources §170.315.b.1- Transitions of care §170.315.a.6 Problem List §170.315.b.2- Clinical Information Reconciliation §170.315.c.1.-3- Clinical Quality Measures §170.315.b.6- Data Export	Because we are a Behavioral Health Electronic Health record, our diagnosis functionality includes the capability to assign a patient a DSM-5 diagnosis as well as an ICD-10 diagnosis. A user must have permission to use the APA DSM-5 diagnoses and descriptions because the DSM-5 content is proprietary property of the APA.	Qualifacts collects a per DSM-5 user per month fee for permission to use the DSM-5 codes and descriptions. We then pay a fee to the APA for each user of the DSM-5.

§170.315.a.9.-Clinical Decision Support	CareLogic includes an integration with a third party clinical information resource tool called Dynamed that uses info button technology so that it can be leveraged during clinical decision making.	There is a per month per agency fee for access and use of this integrated product, Dynamed Plus
Integration with a third party	CareLogic Enterprise S3 includes a middleware called CareLogic Integration Hub that can be used for connecting CareLogic to other systems such as other EHRs, Laboratories, or HIEs.	If a customer requests a custom connection with another system, there is a onetime implementation fee as well as an ongoing monthly recurring fee.
§170.315 (c) (1), (c) (2), (c) (3) Clinical Quality Measures.	CareLogic Enterprise S3 includes an integration with a third party quality measures registry called FIGmd . This feature is called the Quality Outcomes Platform. The integrated technology provides the aggregation of the clinical quality measures as well as the generation of the QRDA 1 and QRDA III. The integration also supports the ability to import a QRDA 1.	There is one time implementation fee per provider as well as a per month per provider fee for access and use of this product.
